

The perfect finish

For James Hardie™ EasyLap™ Panel

Facade

Sto offers a simple, cost-effective and durable finishing render system to complement James Hardie EasyLap Panel. Stolit Coloured Finishing Renders open up a wide range of design options, from a classic stippled or adobe render finish, to the natural surface of concrete or precast panel.

Stolit Coloured Finishing Renders

A simple, cost-effective and long-lasting finishing render system to complement James Hardie EasyLap Panel.

A great combination of properties

Stolit Coloured Finishing Renders in a variety of grain sizes and textures provide the perfect combination of properties; durable, hard-wearing, impact-resistant, weather-tight and colour-stable, ensuring maximum longevity with an individual finish for all James Hardie EasyLap Panel construction.

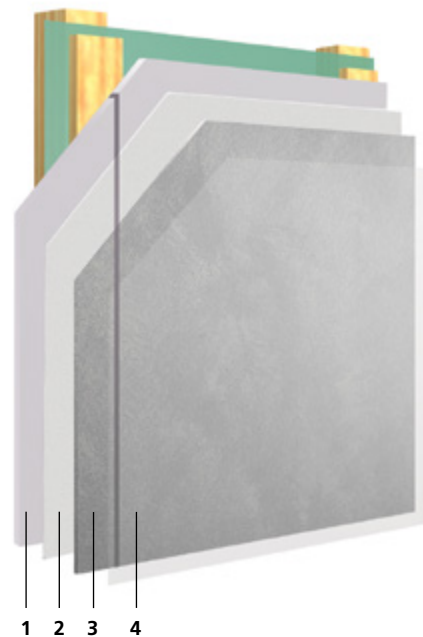

A simple, cost-effective system

Application of Stolit Coloured Finishing Renders are simple and cost-effective due to the shiplap vertical joints of EasyLap Panel construction. The panels are primed and rendered in the selected Stolit Coloured Finishing Render with a StoClear coating or StoColor facade paint for added protection. The system is applied by a registered Sto Contractor and comes with a Sto 10 Year Warranty and maintenance schedule, protecting you and your property investment.

StoColor System

The StoColor System has over 800 shades created to highlight structure or architectural design, or alternatively the colour of your choice can typically be matched electronically. Further to this, Stolit Coloured Finishing Renders are synthetic based and tinted, so the intensity of colour and everyday wear will not affect the appearance or stability of the rendered exterior facade.
